### **FEI help to develop Derby Festivals**

FEI are currently working with Derby City Council and their Cultural Landscape Steering Group to maximise impact of their festivals programme. FEI are conducting a review of the current programme and using their extensive knowledge and experience to help develop festivals in Derby. Working closely with the Cultural Landscape Steering Group to maximise impact of the festivals programme, FEI will cultivate the development of festivals that give greatest potential for long term legacy and sustainability and scrutinise proposals to ensure activity achieves outcomes. FEI will provide a strategic overview for all festival activity and community programmes whilst brokering and facilitating relationships between festivals and artists. FEI will fulfil a mentoring role, contribute towards festival business plans, support business growth, advise on funding bids and act as an advocate for Derby within local, national and international networks. <http://www.derby.gov.uk/>
